CAFÉ

CB
300R

The Neo Sports Café puts Japanese craftsmanship to work and brings together the two main components one looks for in a bike – style and performance. Adding a modern twist to the retro café-racer style, the all new CB 300R is built to make the rider feel invincible.

Its bold new look contrasts brushed alloy radiator shrouds with a blacked-out engine and an underslung, upswept exhaust. The all-new steel tubular frame and stout-looking, 41mm upside down front forks, provide agile handling as well as character. And with a round headlight, taillight and indicators that are all LED, this bike is made to be seen and stand out everywhere.

Round-Shaped LED Headlight

Neo Sports Café round LED headlamp is built with unique lighting for every riding situation.

Tapered Rubber-Mounted Handlebar

The 28.6 mm diameter handlebar in the middle area is designed to have a tapered shape for more secure and stable control.

Monoshock with 7-Step Preload Adjustment

7-level Preload Adjustment rear shock absorbers support all riding conditions, whether riding in the city or touring.

Upside-Down Front Suspension and Hubless Floating Disc

The first of the large, 41mm silver front-back chokes, is the same size as Honda's big bikes. This provides excellent balance in all road conditions. Additionally, providing confidence in braking at any speed are 296mm disc brakes on the front of the radial mount, and 4 pot callipers.

Newly Designed Muffler

The newly designed exhaust based on the Neo Sports Café DNA is reproduced from Honda's top-class big bikes. The interior features a 2-room structure, providing powerful and aggressive engine sound, while increasing the efficiency of the acceleration response.

New Full LCD Multifunction Meter

Gear shift warning lights for when the engine speed reaches the specified range. And the Peak Hold function, which allows you to ride exactly how you wish.

Available in 2 colour variants - Candy Chromosphere Red and Matte Axis Grey Colour
