State-of-the-art legend.

Welcome to the end of the world. The new G-Class is already there. It's everywhere. Continuing the tradition of a vehicle built for the most extreme conditions. The G-Class feels different to the mainstream, particularly in places where other vehicles dare not tread. As if these places were just made for it. Join us on a journey to the holy grail of mobility. Discover the new G-Class.

*Please read the disclaimer.

Stronger than time.

Stronger than time.

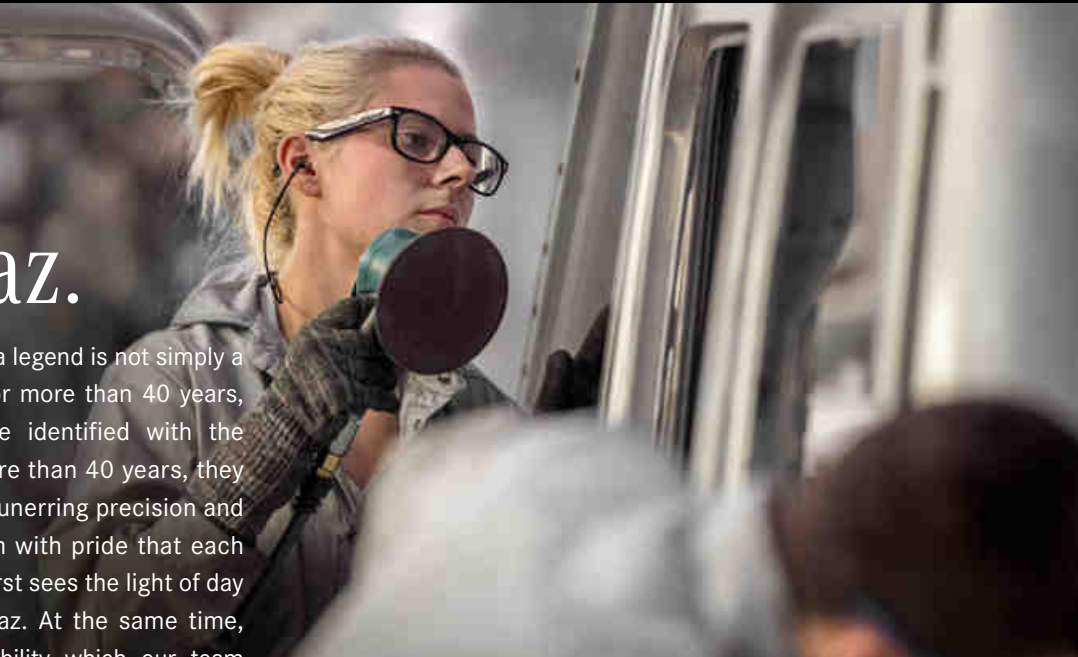

Some time ago, a group of engineers in Stuttgart and Graz developed an all-new genetic code: the DNA of a cross-country vehicle – iconic, robust and almost indestructible. They constructed parts whose functions even now fulfil their purpose in the same way. Components which, over generations, have combined to form a unique character. They created a design which eschewed short-lived trends and thought nothing of fancy gimmickry. A timeless vehicle which, over time, was to become a legend – stronger than time.

G for Graz.

The development of a legend is not simply a job. It's a calling. For more than 40 years, our employees have identified with the G-Class. And for more than 40 years, they have done this with unerring precision and passion. It fills them with pride that each and every G-Class first sees the light of day at the factory in Graz. At the same time, there is a responsibility which our team gladly assumes day after day. This is the only way to fill the legend of the G with life.

*Please read the disclaimer.

A photograph of three men in a workshop setting. On the right, an older man with a grey beard and glasses, wearing a brown vest over a white shirt, is leaning over a car engine. In the center, a younger man in a light blue shirt stands with his arms crossed, smiling. On the left, another man in a light-colored patterned shirt is looking down at the engine. The background shows industrial workshop elements like overhead lights and metal beams.

From prototype to phenomenon.

It started with a vision: how do you build the perfect cross-country vehicle? What followed were numerous development steps charged with passion and devotion, characterised by a love of detail and a degree of care that can be felt in each G to this day. All combined with the desire to experience the joy we feel in building the G-Class again on every subsequent journey in it. Be it on the off-road trails of the Earth or the world's most splendid boulevards.

Legends never die. This is where they are born.

On the Schöckl, the local mountain of Graz, the G-Class is tested for its off-road capability. Only those that endure here deserve the “Schöckl” badge as a sign of ultimate off-road performance.

Stronger than rock.

A monolith forges ahead.

The dune looms relentlessly. Picking a route through the giant sand hills is anybody's guess. But the new G-Class remains unperturbed – slicing through the terrain, merging with its surroundings, becoming one with nature. It powers across the wasteland, cuts a swathe through the desert, literally moves mountains a little piece at a time. And then comes to a halt. Made it! Majestically it surveys its terrain and celebrates its triumph. This is its destiny. Its character. Its DNA.

Ahoy.

The G-Class does things “as the crow flies”. Even in the water. The spray rises up menacingly. A tidal wave slaps into the bank. The legend channels its way along the riverbed. Where others look for bridges, the G-Class takes the direct route. Thanks to its fording depth of 70 cm, the new G-Class appears to be one with the water. Right up until the driver reaches the opposite bank. With the G-Class, there’s no danger of getting your feet wet. Land ahoy!

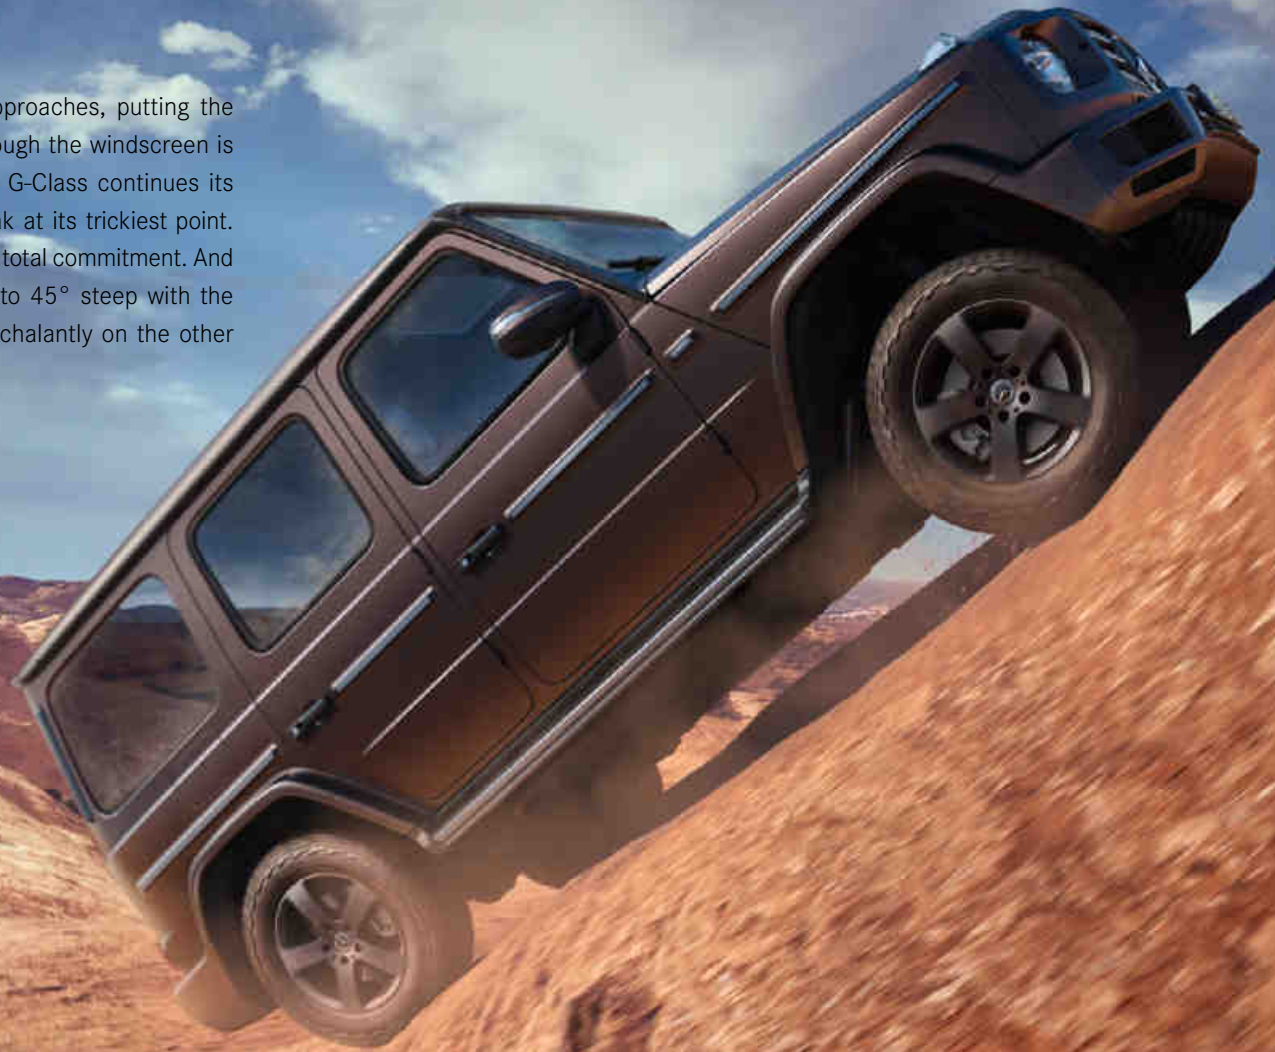

[Test Drive](#)[Contact Us](#)[Dealer Locator](#)

Securely in place.

Hold your breath. Ahead lies nothing but rugged rock and steep slopes. Blocking the view but not the route. Thanks to a low centre of gravity which enhances its off-road capability, the new G-Class is utterly unfazed as it manoeuvres up and down the gradients. Its unique design helps it to remain stable even when tilted to the extreme – up to 35° – with consummate ease. So the only thing which seems to be askew is the horizon.

As high as it gets.

The gradient really starts to rise as the summit approaches, putting the vehicle in an extreme position. All that is visible through the windscreen is sky. And it's getting closer and closer. Yet the new G-Class continues its inexorable ascent unblinkingly, surmounting the peak at its trickiest point. For generations, the G-Class has displayed nothing but total commitment. And thanks to 100% gradeability, it scales gradients up to 45° steep with the accustomed aplomb. Only to climb down again nonchalantly on the other side.

Endless expanses.

It is as if nature itself had designed the generous, spacious interior of the new G-Class. As a result, the vehicle guarantees maximum comfort even in the most uncomfortable environment. The new interior concept turns the G-Class into a shining example of spaciousness and comfort for all occupants. The interior design took a quantum leap forward as well. Those who love freedom and unusual design will find both here.

A dark green Mercedes-Benz G-Class SUV is shown in profile, parked on a rugged, moss-covered rocky terrain. The vehicle is positioned in the middle ground, with a steep, mossy hillside in the background. The text "Stronger than zeitgeist." is overlaid in a large, white, serif font across the center of the image.

Stronger than zeitgeist.

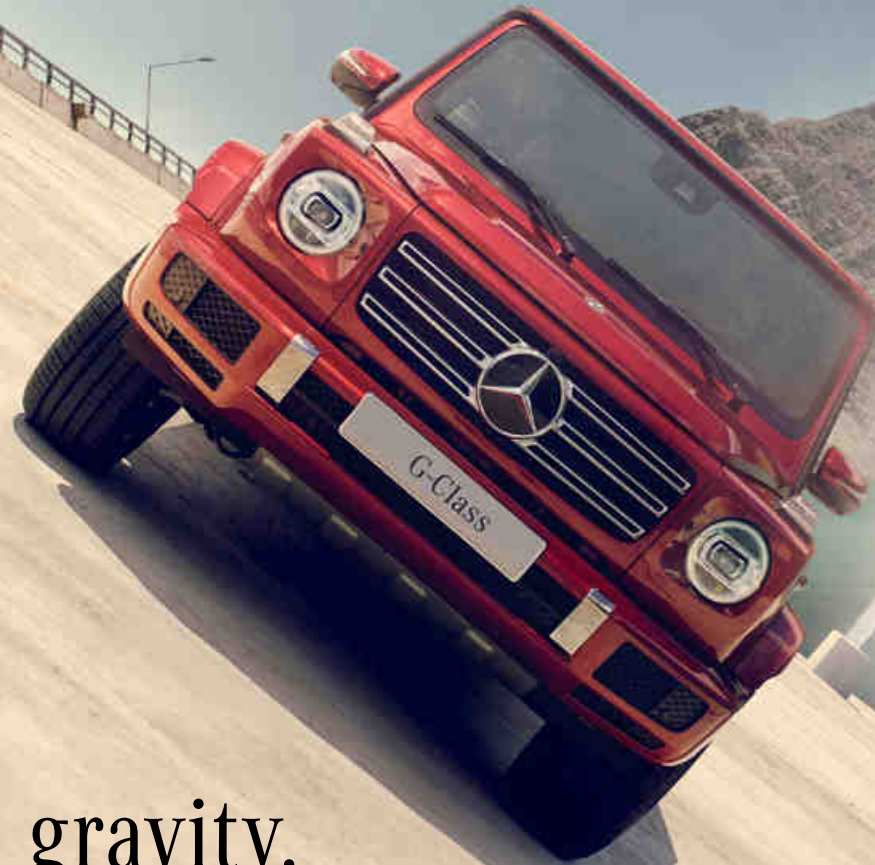

Enhanced rather than changed.

There are moments in which time seems to stand still. Reverential silence then reigns supreme. The G-Class is made for moments like these. There can be no doubt: it is timeless. Thanks to its characteristic design. Its corners and edges are still there. Even though the entire vehicle has been almost completely revised. The new G-Class is over 12 cm wider and 5 cm longer, for example. The expanded interior offers substantially more comfort on campaigns of conquest around the world.

There are things we hold on to.

After almost 40 years and more, it was time to make fundamental decisions. Starting with the grab handle, which stays where it is. Indispensable in terrain, the handle also plays a decisive role in the characteristic design of the interior. It is part of the unmistakable DNA of the G-Class – as are spare wheel, door handle and indicators, all of them iconic elements that have coined the distinctive appearance of the G-Class for generations. Also still there is the command centre for successfully making progress in terrain: the distinctive buttons of the three differential locks. Otherwise much has changed, however: The completely revised interior design has reached a new level – the highest. The design idiom and the proportions in the interior leave no doubt that this is the G-Class: confident, angular, iconic.

Stronger than gravity.

A low rumble announces its coming. The ground trembles. The air vibrates. Then the new G-Class comes around the corner. It impresses with its expressive exterior design. A look that makes it clear from the very start: I call the tune here. Off the road, the G-Class has always been unmatched. But the off-road giant also captivates with superior handling in the city. For all the power, the new G also shines with significantly improved ride quality on the road. This makes it a king away from the wilderness as well – in the urban jungle, in fact.

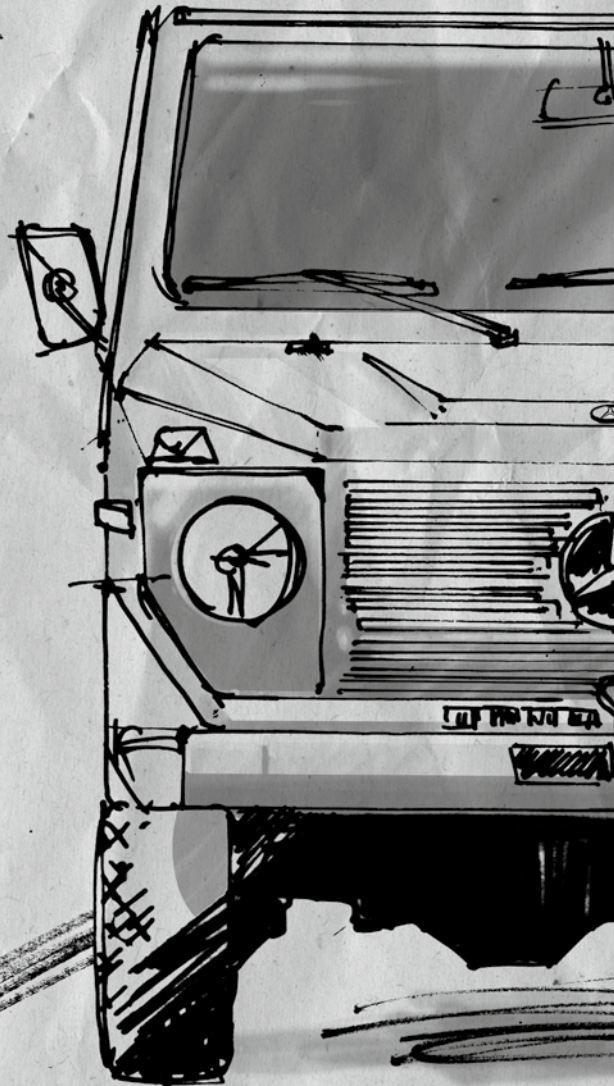

Comfortably Exclusive

The G-Class knows no limits. Not even in the interior. While its outward appearance is hardly changed, the interior of the new G-Class has been transformed beyond recognition. The vehicle offers noticeably more room for all occupants. Newly designed seats upholstered in the finest Exclusive nappa leather that impart a feeling of security, and the massage functions that can be optionally picked, provides for relaxation, whether you are in the city or far away from civilisation.

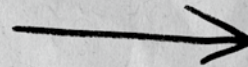

Some things never change.

The unique DNA of the G-Class was created around 40 years ago. Iconic features which, now as then, perform specific functions and lend the G-Class its unique appearance. They can also be found in or on the new G-Class: the distinctive door handles and the characteristic closing noise, the robust exterior protective strip, the exposed spare wheel on the tailgate, the striking turn indicators, and the grab handle for the front passenger which is so indispensable when negotiating off-road terrain. These exceptional details combine with the chiselled silhouette to lend the off-roader its unique look. They are what makes every G-Class a G-Class.

Rolling milestones.

The evolution of a legend.

1979

A legend is born: the “G” in the model designations for the 460 series is derived from the first letter of the German word “Geländewagen”, which means “cross-country vehicle” or “off-roader”, but it could just as well stand for Graz as this is where the G-Class has been produced by hand since the beginning. It was based on a solid ladder frame with coil-spring rigid axles and at launch offered a choice of four engines, two wheelbase lengths, and five body variants. The model line-up ranged from the 240 GD to the 300 GD and from the 230 G to the 280 GE with outputs between 53 kW (72 hp) and 115 kW (156 hp).

1980

Our very own popemobile: to mark the visit of Pope John Paul II to Germany in November 1980, Mercedes-Benz developed a unique “popemobile” based on the 230 G cross-country vehicle. It featured a large plexiglass dome to afford all the faithful a great view of the pontiff. In 2007, Pope Benedict XVI appeared in a G 500 painted in mystic white during his Wednesday audiences at St. Peter’s Square. The open body and the folding windscreen allowed close contact between pilgrims and pontiff.

1983

The winning gene in action: in their 280 GE – the top-of-the range cross-country vehicle of the time – rally drivers Jacky Ickx and Claude Brasseur defied the treacherous desert sand of the Sahara and all their competitors in the race to win the passenger-car classification in the legendary Paris-Dakar desert rally. For the gruelling long-distance rally, the body of the 280 GE was optimised in the wind tunnel and also equipped with selected aluminium components to make it lighter than the standard-production model.

1989

Happy birthday: by the time of its tenth birthday, the off-roader had met customer demands for enhanced comfort and luxurious appointments. In the thoroughly revised 463 series, the G now featured a refined interior, more comfort-oriented suspension, and permanent all-wheel drive, all of which greatly enhanced on-road handling. In the Cabriolet version, too.

1999

A strong connection: in 1999, Mercedes-Benz fused two unique strands of DNA which were actually natural bedfellows anyway – the G-Class and AMG. Since then the AMG versions of the cross-country vehicle have been winning more and more fans. So much so that they are now the most popular of the G versions. The G 55 AMG, the first G model in AMG guise, had a V8 naturally aspirated engine with an output of 260 kW (354 hp). In 2004, this first exclusive AMG model was followed by an updated variant with a supercharged engine.

2012

The family tree grows: the G-Class received an all-new interior following an extensive facelift. The dashboard and the fully revised centre console marked a turning point in the interior design, with the focus now more firmly on ergonomics. There were also a few obvious exterior changes, although these didn't alter the character of the G-Class: new exterior mirrors and the LED daytime running lamps, for instance, enhanced road safety and made the G an ultra-modern legend.

2013

New addition to the G-Class family: an exceptional model was added to the line-up. The G 63 AMG 6x6 made the G-Class king of the desert. It marked the start of a series of spectacular G-Class special models such as the G 500 4x4² and the Mercedes-Maybach G 650 Landaulet. All of these models added further unique facets to the G-Class range and continually enhanced the fascination of the off-road legend.

2018

The evolution continues: longer, faster, wider. The new G-Class offers tangible improvements across the board. The new space concept coupled with the angular, elegant interior design enhances ride comfort considerably. The suspension, new to the G, lends the evergreen a vastly superior driving feel on the road. In off-road terrain, on the other hand, the new G-Class impresses with effortlessly superior handling on any surface. As ever, the exterior alone impresses with its characteristic design. Inside, however, there is a whole new world waiting to be discovered.

Backbone.

Stamina means everything in tough terrain. Here there's no room for buckling or retreating. Here it's all about character. And strength of character shines through in the vehicle's backbone. In the case of the G-Class, this has always been the exceptionally robust ladder frame. Made from sheet steel up to 3.4 mm thick, the ladder frame is much more suitable for tough off-road use than a self-supporting body. In addition to this, the decoupling of the noise from the suspension and the road reduces the interior noise level and thus enhances the ride comfort.

Full concentration ahead.

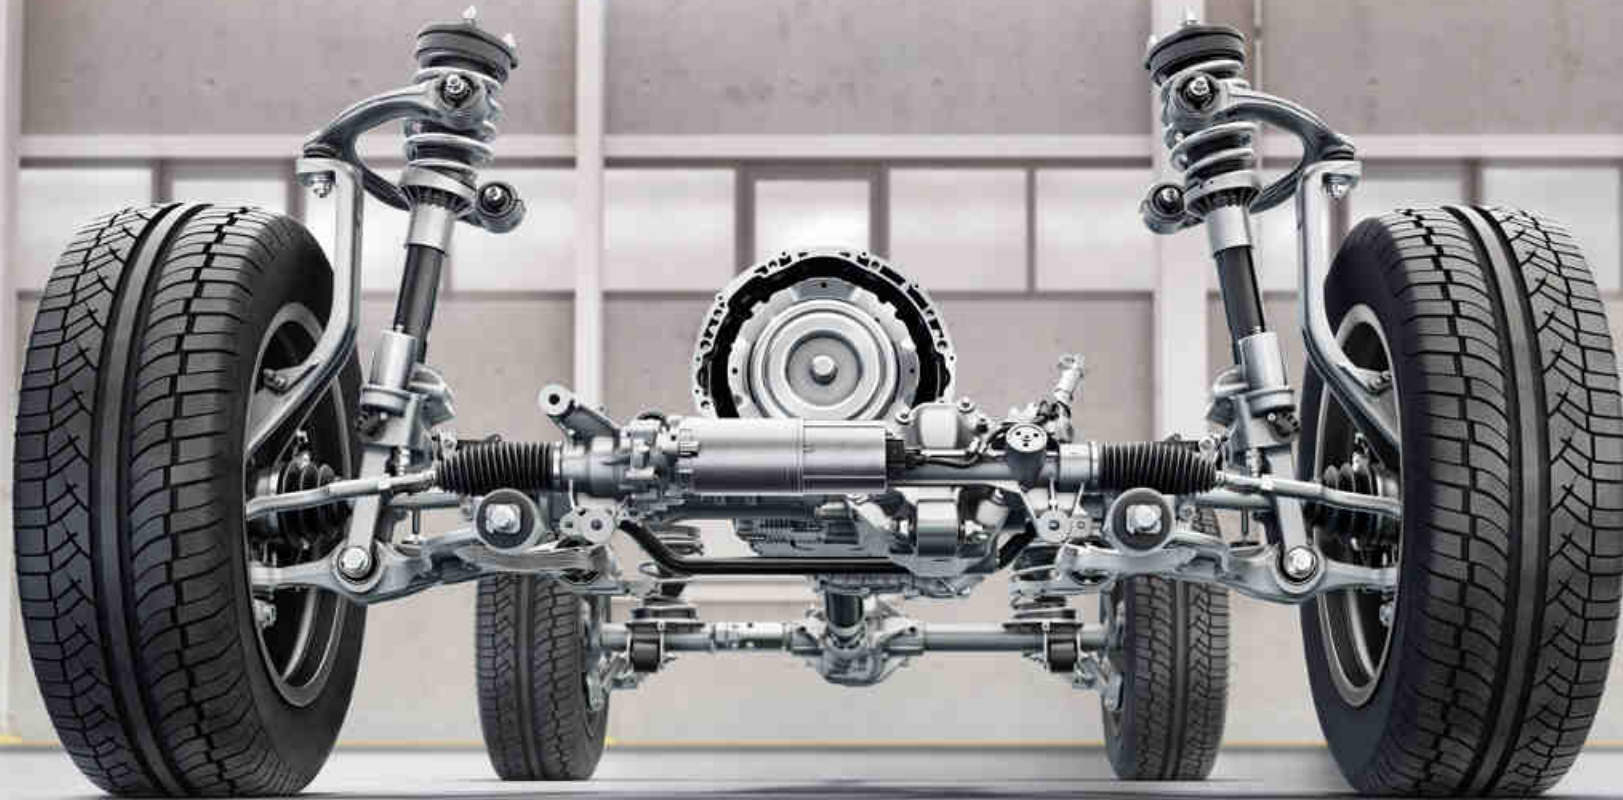

Powerful though the new G-Class is, it only ever uses its enormous power where it is needed: when negotiating off-road terrain, for example, there may only be one wheel which has traction. In this case, the three locks on the centre, rear-axle and front-axle differential ensure that the drive torque is directed to precisely where it is required. Power paired with efficiency – the right way to get ahead.

Overcomes obstacles at the push of a button.

Even the toughest of conditions pose little problem to the new G-Class. The low-range gearbox adjusts the shift ranges of the 9G-TRONIC Transmission to driving in off-road terrain and on uphill gradients. Pressing the LOW RANGE button in the centre console increases the torque at the wheels. As a result, negotiating very difficult off-road terrain, moving off on extreme uphill gradients as well as driving downhill are all possible with significantly enhanced braking performance.

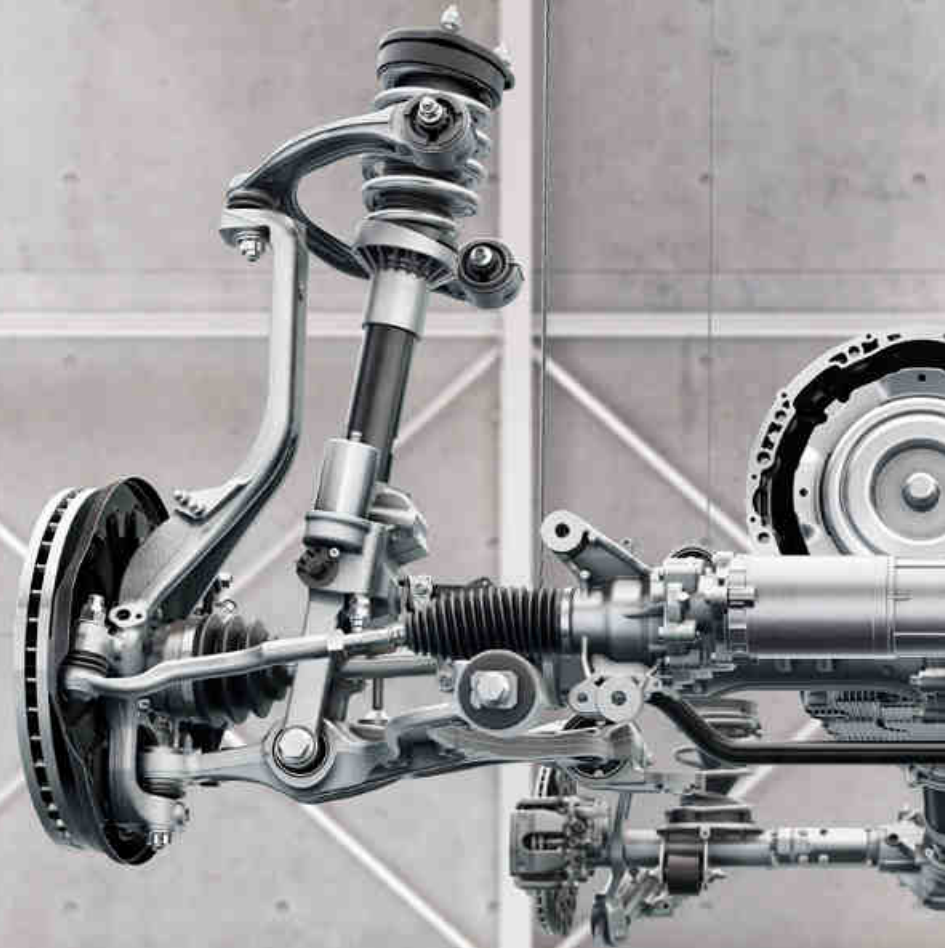

More statics for more dynamics.

Trust is good, control is better. The new axle architecture ensures that this is the case. Demanding terrain calls for high ground clearance and outstanding traction. Both are assured thanks to the precise independent front suspension and the robustness of the rigid axle at the rear. This design enables the permanent all-wheel drive to deliver its full power and manoeuvre the G through the terrain with purpose. With its high links, the new independent suspension provides maximum ground clearance. On the road, too, the new axle architecture delivers tangibly enhanced performance, making the new G-Class an impressive proposition with its better controllability and more precise wheel location. Furthermore, the off-roader is lighter, which further improves its handling.

As imperious on the road as it is off it.

The world has been conquered. Now it's time for the road. The new G-Class is also predestined for this. Standard equipment for the new G-Class includes **Suspension with Adaptive adjustable damping** enhances the ride comfort and the perceptible driving sensation both on and off the road. The dampers adapt in line with the applied force, optimising the chassis and suspension set-up in any given situation. The roll and pitch stabilisation varies the damping characteristics continually and reduces body movement automatically. Furthermore, the new Direct-Steer system offers the driver a markedly more direct steering ratio. In addition to this, both vehicle handling and agility have been enhanced considerably. The steering effort is adjusted electronically depending on the speed and the selected driving mode. This set-up enables the driver to experience optimum response and steering characteristics at any speed as well as increasing both ride comfort and driving feel – be it in the rush hour or in the solitude of nature.

Standard Equipment

LED High Performance Headlamps

The LED High Performance headlamps illuminate the road considerably more precisely and generously than conventional halogen or xenon headlamps thanks to state-of-the-art LED technology. Thanks to the high light range traffic situations and obstacles can be seen earlier, thus resulting in increased safety. The uniform warm-white light quality is close to the colour temperature of daylight. This puts less of a strain on your eyes and helps you to concentrate for longer and remain more relaxed.

Daytime running lamps and perimeter light featuring LED technology

Main beam headlamps featuring LED reflection technology

Low-beam headlamps featuring LED projector-beam technology

Headlamp Assist

Radiator trim with chrome elements

With this radiator grille you are emphasising the exclusive front end design of the G-Class even more strongly. The louvres are finished in fine chrome, the inserts in silver chrome. For a true eye-catching feature, precisely to suit your tastes.

Multifunction sports steering wheel in nappa leather

The multifunction sports steering wheel in nappa leather with control panels in chrome has a perforated grip area - outstanding qualifications for adopting a sporty driving style. Not only will you see this, you will feel it straight away when touching the steering wheel. The high-quality, soft nappa leather is a quality experience in itself.

Pre-installation For Rear Seat Entertainment System

With the preinstallation for the Rear Seat Entertainment System you can connect a host of accessory products to the vehicle. Using Plug & Play, technical equipment such as the Apple® iPad can be powered without any visible cables. When not in use, the preinstallation is safely concealed beneath a magnetic catch.

Rear Mounted Spare Wheel

The G-Class' mounted spare wheel ensures your adventure doesn't cease to surprise and keeps the off-road character of the icon intact.

Under-ride Guard

This Under-ride Guard protects the entire underbody of your vehicle. As such you are always perfectly equipped for those spontaneous off-road excursions. In addition, the underguard shields the engine compartment, thus effectively reducing dirt.

COMAND Online

The new G-Class does not just connect you to the world. It is also connected to the world itself. Thanks to COMAND Online, there is practically nothing left to be desired where infotainment, navigation and communications are concerned. Information is shown on the 31.2 cm (12.3-inch) high-resolution display of the multimedia system. The HDD navigation provides quick guidance and can warn the driver of dangers in advance. This involves the exchange of important information between vehicles, such as dangerous situations already detected by other vehicles.

Smartphone Integration

Smartphone Integration merges the mobile phone with the infotainment system via Apple CarPlay™ and Android Auto. This gives you convenient access to the most important applications on your smartphone. You can also use apps from third-party quickly and easily.

Ambient lighting – feel at home as soon as you get in

Showcase the interior according to your personal preferences or current mood. With the 8 colours you can experience a unique feel-good atmosphere throughout the interior. As part of this a variety of areas are illuminated such as the cup holder, footwell, trim on the dashboard and door panelling.

THERMOTRONIC A/C

The THERMOTRONIC automatic climate control system with 3 climate zones and 3 climate styles provides an individual feel-good atmosphere on board. The driver and front passenger are able to set the temperature, air distribution and climate style to suit their personal needs. The third climate zone is in the rear – with separately adjustable temperature and airflow.

*Please read the disclaimer.

Leave everything behind you

For all those who love the practical side of things: the EASY-PACK load compartment cover protects luggage from the sun and prying eyes in equal measure. The dividing net creates a barrier between the vehicle occupants and non-secured items in the load compartment. The trailer coupling with ball head has been tested by Mercedes-Benz and ensures that the frame optimally absorbs the tractive forces exerted by the trailer. If the trailer starts to sway, the standard-fit ESP, with trailer stabilisation applies a specific brake force to the wheels, helping the driver to keep the vehicle/trailer combination on track and to guide it safely through the traffic.

Partition net

This feature can protect you from inadequately secured objects in the luggage compartment. The dividing net is very easy to use. It can be installed and removed very quickly and easily behind the first or second seat row.

Rubber mat for load compartment

The robust rubber mat protects the luggage compartment floor of your vehicle reliably against damage and dirt.

Widescreen cockpit

Futuristic-looking display concept: two 12.3-inch screens for the instrument display and media display are comprised beneath a continuous glass screen. This way you can determine the content of the dynamic displays. With 3 display styles you can adjust how information is depicted in the instrument display to suit your preferences.

Frameless rear-view mirror

Futuristic-looking display concept: two 12.3-inch screens for the instrument display and media display are comprised beneath a continuous glass screen. This way you can determine the content of the dynamic displays. With 3 display styles you can adjust how information is depicted in the instrument display to suit your preferences.

Mercedes me Connect

The communications module (LTE) offers you a definite advantage in terms of convenience and safety. It provides your vehicle with a connection to the internet – allowing you to make use of helpful services from Mercedes me connect. Two mobile phone antennas and an LTE-compatible SIM card ensure a fast connection.

Live Traffic Information:

Arrive at your destination stress-free by the best route – whether in the rush hour or on a trip. With Live Traffic Information, your navigation system receives traffic data in real time for optimised dynamic route guidance. Accurate up-to-the-minute information on traffic jams, stop-and-go traffic and more helps you to reduce your journey time

Let your personal digital assistant take the experience to an all new level in your everyday life.

- ✓ Stay informed. About your Mercedes-Benz and everything associated with it. Tyre pressure: okay! Fuel tank: nearly full!
- ✓ Off to new places: You can directly send any type of destinations to your vehicle from your smartphone.
- ✓ Relax on the road. Calmly complete your first conference call during your journey as the navigation system plots the ideal route to your next meeting.

All-in-one service package: Get reminders and never miss a service appointment, conveniently book your service appointment online.

Vehicle Monitoring

Parked Vehicle Locator: Do you remember where you parked? Your smartphone does. It can locate your vehicle within a radius of 1.5 kilometres and show you the way to your vehicle on a map

Valet Protect: Now set a geographic boundary within which your vehicle is free to move and receive an email notification as soon as your vehicle leaves the area.

Vehicle Tracker: The Vehicle Tracker lets you receive your vehicle's geo-coordinates via GPS. The driver can have Vehicle Tracking deactivated by calling the Customer Assistance Centre.

Remote Vehicle Finder: This feature allows you to activate the direction indicators and horn from the Mercedes me app to help you easily find your vehicle at night or in large car parks.

Vehicle Set-up

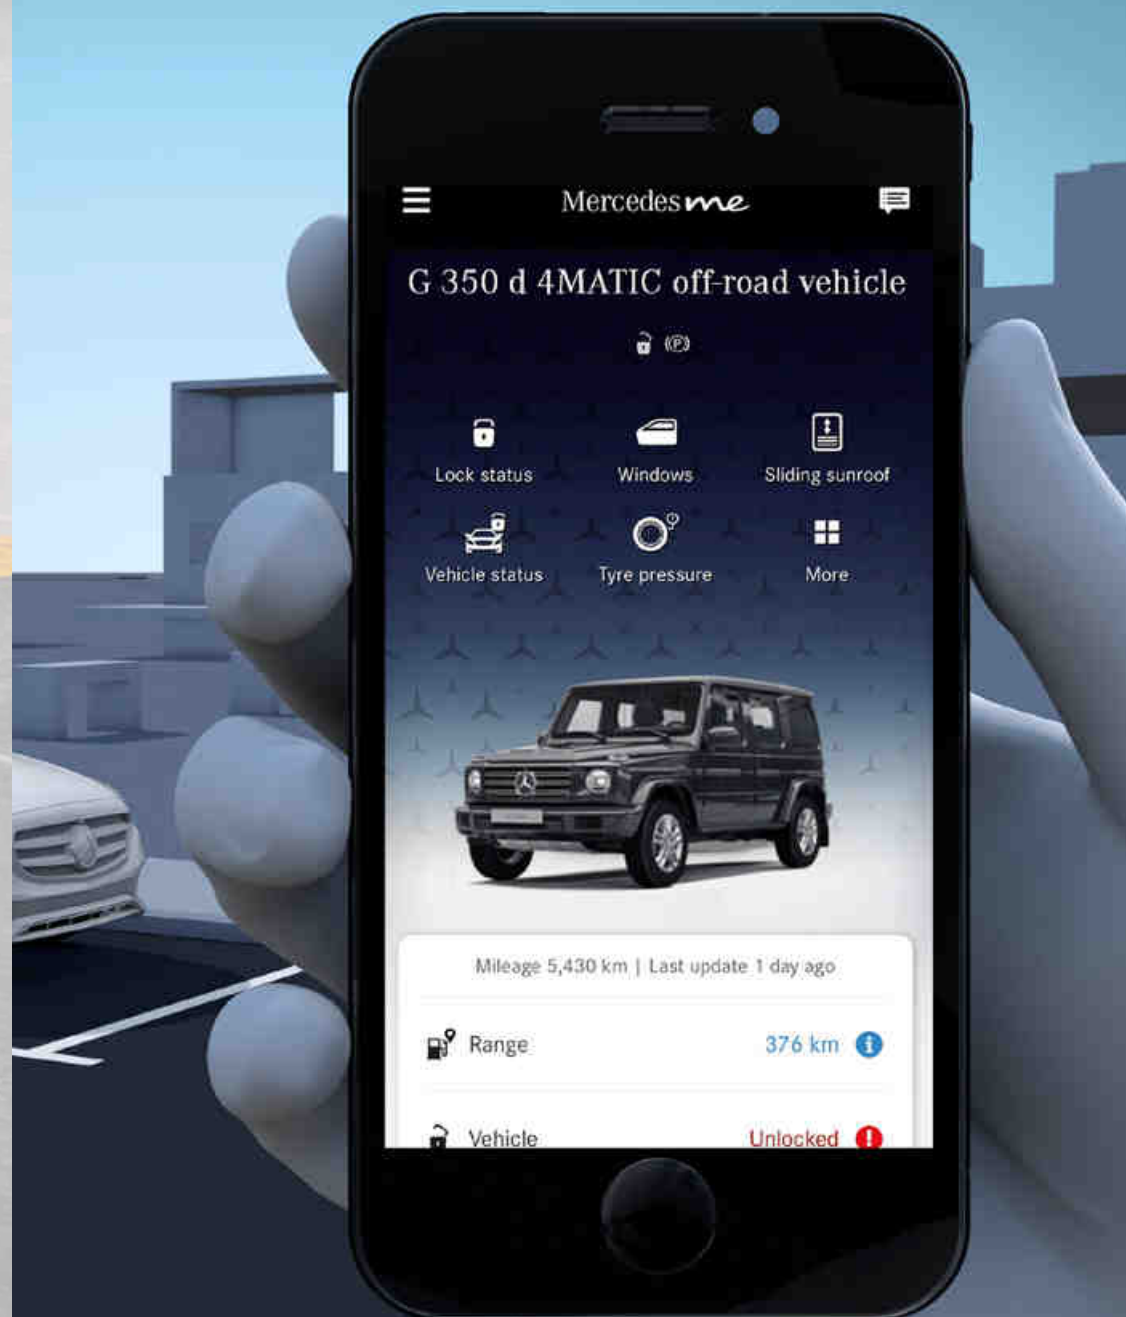

Remote Retrieval of Vehicle Status: Enjoy easy access to the most important information about your vehicle. These include mileage, tyre pressure, washer fluid level, fuel tank level and also when the next service is due.

Remote Door Locking and Unlocking: With the Mercedes me App or from the Mercedes me Portal, you can lock and unlock the doors from anywhere in the world and receive an acknowledgement on your smartphone.

Parking damage and theft notification: Thanks to notifications via the Mercedes me App, you are informed immediately if someone drives into or steals your vehicle. Your vehicle also indicates any detected damage via the head unit.

Speed Alert: With the Mercedes me App, you receive an alert on your phone if your vehicle exceeds a certain speed. You can also set the desired threshold. This allows you to stay informed when someone else is using your vehicle.

Send2Car function: Found a place of interest or the best restaurant in town? Simply send the address to your vehicle using the Mercedes me App so you know where you're headed as soon as you step inside.

Preinstallation for Navigation Services

Display: View up-to-the-minute information on the map in a wealth of detail. At a glance, you can see petrol stations with price information, parking facilities with the number of available spaces, weather symbols with up-to-the-minute temperatures and lots more additional information

Local Search: With the "Local Search" service, you can search freely for any desired locations or addresses. Enter the search term via the Controller or simply make use of voice entry. After a brief confirmation, you can navigate direct to your desired destination.

Mercedes-Benz emergency call

With the Mercedes-Benz emergency call system, if an accident is detected, a communications module with its own SIM card automatically triggers an emergency call for assistance. Alternatively, a call can be triggered manually to organise assistance.

Safety Features

Active Lane Keeping Assist – keeping safely in lane:

If you cross a broken or continuous line unintentionally, the system can warn you via the vibrating steering wheel. With a continuous line, or if the lane behind a broken line has been detected as occupied, the assistance system can intervene further with unilateral braking.

Airbags:

Front airbags are able to protect the head and upper body of the driver and front passenger in severe front impacts. In addition they stabilise the entire body and help to reduce the risk of severe injuries. The side airbags in the rear protect the chest area on the outer rear seats in the event of a severe side impact. Together with the standard Window bags you therefore have optimum safety potential for preventing or lessening injuries. The air cushions slide between the side of the door and the occupant.

PRE-SAFE® system – preventive occupant protection:

The PRE-SAFE® system makes use of the time prior to an impending accident on your behalf. A host of measures are able to reduce the loads generated as a result. The innovative PRE-SAFE® Sound generates a noise from the speakers which is able to trigger a protective reflex: your hearing briefly disconnects, thus protecting itself from the loud noises of the crash.

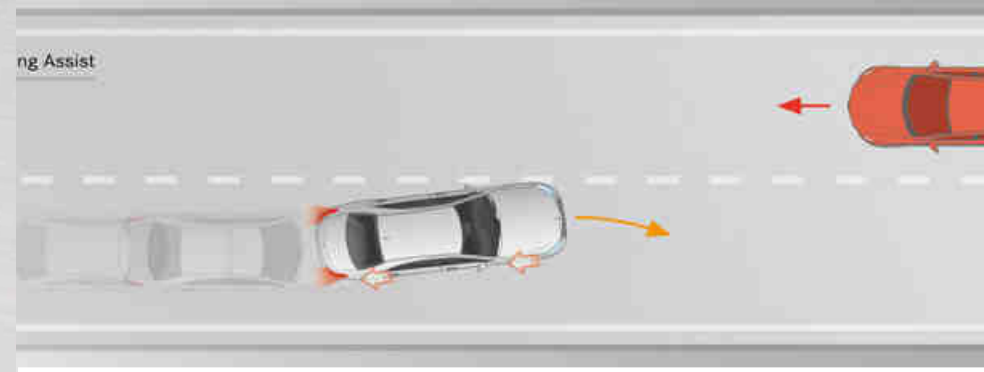

Parking package with reversing camera:

With this package the choice is yours: park your vehicle yourself – or have your vehicle parked stress-free. Practical support already starts when looking for and selecting a parking space. Once detected, you can manoeuvre into it effortlessly thanks to the reversing camera or enjoy the support of Active Parking Assist when manoeuvring in and out.

Fluorescent jacket for driver and passenger:

The G 350d is built to keep you safe even when it's not rulling the roads. In case of an accident or a breakdown, this green fluorescent jacket ensures you are always visible on the road, day or night.

A declaration of love of craftsmanship.

Anyone who has visited the city of Graz will understand our passion for craftsmanship. This explains the loving attention to craftsmanship which has defined production of the G-Class for more than 40 years now. The diversity of the model range calls for manual production right up to the present day. Many details on the inside and outside of the new G-Class are lovingly hand-crafted. In this way, collectors' items with the highest standards of exclusivity are created by the hands of masters.

The most important detail of a G-Class is not a part at all – it is the time our team passionately devotes to its creation. Because the only way to create a vehicle which is a reliable companion in tough off-road conditions as well as in the urban jungle, which combines comfort and driving pleasure, and which fuses protection and safety in a sophisticated design is to display this immense devotion and use the finest materials. The new G-Class only leaves its birthplace after around 100 production hours – a journey already undertaken by over 300,000 vehicles.

G manufaktur customization.

The G-Class has known routes which remain hidden to others from the outset. This individuality is reflected in the designo philosophy in particular. The design gene is particularly prominent in the DNA of the G-Class. Because the new G-Class is as confidently stylish at scaling design heights as it is effortlessly superior in handling off-road terrain. Equipment variants exclusively for the new G-Class, in which everything is perfectly matched and tailored to the highest level. Perfect craftsmanship, unique style – or, to put it another way, designo.

[Test Drive](#)[Contact Us](#)[Dealer Locator](#)

Stainless Steel package.

Nothing combines forbidding nature and tasteful luxury as sublimely as the new G-Class. So what better way to adorn this off-road jewel than stainless steel? The Stainless Steel package consists of high-quality side running boards, a spare wheel cover in stainless steel, illuminated door sill panels in stainless steel, a rear sill protector in stainless steel, and an exterior protective strip with trim insert in black with a striped finish – lending the G more than a touch of exclusivity.

FEATURES AT A GLANCE

Spare wheel cover in stainless steel with 3D Mercedes-Benz star

Running boards on the left and right sides

Door sill panels in stainless steel, illuminated, in the front with "Mercedes-Benz" lettering

Rear sill protector in stainless steel, grooved

Exterior protective strip with trim insert in black stripe-effect finish

Not with Front Mud Flaps.

*Please read the disclaimer.

AMG line package

Sportiness with corners and edges – the AMG Line for the new G-Class. Consisting of AMG light-alloy wheels with a high-sheen finish, exterior protective strip with inserts in brushed aluminium finish, and flared wheel arches, the icon makes no secret of its sportiness. Sporty elegance abounds in the interior, too, on account of the steering wheel, AMG floor mats and red highlights. The dynamic look is rounded off by the sports exhaust system and two additional trim elements in high-gloss chrome on both the front and rear bumper.

FEATURES AT A GLANCE

Hallmark AMG design, consisting of high-gloss chrome trim in front and rear apron

50.8 cm (20-inch) AMG multi-spoke light-alloy wheels

AMG flared wheel arches

Perforated front brake discs

Front brake callipers with “Mercedes-Benz” lettering on the badge

Exterior protective strip with trim insert in a brushed aluminium finish

3-spoke multifunction sports steering wheel in nappa leather, with flattened bottom section, heavily embossed in the grip area, with Touch Control buttons

Red contrasting topstitching and red belts in conjunction with leather or nappa leather in black

AMG floor mats with “AMG” lettering

Night package.

A timeless classic like the G-Class bridges the gap between day and night. Not least thanks to the spectacular design of the Night package, which can be further optimised with the Stainless Steel and AMG Line packages. A wealth of black design features creates an impressive contrast with the vehicle's appearance and lends the exterior a sporty, expressive character. Optionally available large black wheels featuring an exclusive design as well as Standard darkened headlamps, turn indicators and tail lights further underline the sportiness of the equipment package. By night just as by day.

FEATURES AT A GLANCE

Spare wheel ring, exterior mirror housings, radiator trim louvres and Mercedes star surround painted in obsidian black

Exterior protective strip with trim insert in black, with pinstripe finish

Darkened headlamps, turn indicators and tail lights

Front and rear bumper trim painted in obsidian black

Radiator grille including louvres and surround of Mercedes star painted in Obsidian Black

Darkened indicators and tail lights as well as headlamps

Exterior mirror housings painted in Obsidian Black

Also available with Stainless Steel package.

Give your vehicle a particularly exclusive touch with the Stainless Steel package. Spare wheel cover with 3D Mercedes-Benz star, rear sill protector or illuminated door sill panels with "Mercedes-Benz" lettering are finished in stainless steel and show your sense of dynamism and individuality.

INCLUDED:

Running boards on the left and right sides

Exterior protective strip with trim insert in black stripe-effect finish

Spare wheel ring painted in Obsidian Black

Trim elements in the bumpers painted in Obsidian Black

Exterior protective strip with trim insert in a Black pinstripe look

Night Package with AMG Line.

Trim elements in the bumpers painted in Obsidian Black

Night package magno

The Night Package magno adds further attractive features. Particularly eye-catching highlights in striking obsidian black reinforce the individuality and sporty standards of your vehicle.

FEATURING INSERTS IN BLACK MAGNO:

Radiator grille and louvres

Darkened indicators, tail lights and headlamps

Exterior mirror housings painted in night black magno

Spare wheel ring

Trim elements in the bumpers

Exterior protective strip with trim insert in a black magno pinstripe look

Night Package magno with Stainless Steel Package

Give your vehicle a particularly exclusive touch with the Stainless Steel package. Spare wheel cover with 3D Mercedes-Benz star, rear sill protector or illuminated door sill panels with "Mercedes-Benz" lettering are finished in stainless steel and show your sense of dynamism and individuality.

INCLUDED:

Running boards on the left and right sides

Exterior protective strip with trim insert in black stripe-effect finish

Black Exterior Elements

Black is beautiful: with the G manufaktur Black Accents, you can highlight the individuality and dynamism of your vehicle even further. You have the choice to create selective highlights, or to have your vehicle appear totally in black, except for the side running boards.

Roof painted in Obsidian Black

Bumpers and wheel arch flaring in Obsidian Black

Spare wheel ring painted in night black magno

Black is beautiful: with the G manufaktur Black Accents, you can highlight the individuality and dynamism of your vehicle even further. You have the choice to create selective highlights or, for the first time since the introduction of the G-Class, to have your vehicle appear totally in black.

Spare wheel ring painted in obsidian black

Soak your rear mounted spare wheel in tints of extravagance.

Spare wheel ring painted in the vehicle colour

Douse your spare wheel in the hues of luxury.

Front mud flaps

With the mud flaps you can protect your vehicle against scratches and stone damage. Traffic following behind can also be saved from damage. The flaps are made of high-quality, UV-resistant material which is very durable. The overall appearance of your vehicle is maintained since they blend seamlessly into the exterior design.

G manufaktur interior

Lift the interior of your G-Class to a new level of hand-finished craftsmanship – and design it entirely to suit your personal preferences. The carefully selected materials such as nappa leather in the widest variety of colours and patterns plus individual topstitching transform the entire interior into your unique feelgood oasis.

Leather covered instrument panel

designo roof liner in black DINAMICA microfiber

Velour floor mats with edging in nappa leather

Frameless interior mirror

Sun visors in black DINAMICA microfibre

Control panel for power windows on driver's side in silver chrome

Power window switches on front passenger side and in rear in silver chrome

"G manufaktur" badge on the grab handle for the front passenger

Upper and lower parts of instrument panel in leather with extended scope of topstitching

Upper door centre panels, kneepads, armrests in the doors and centre console plus inside of tailgate in nappa leather

Upper door centre panels and inside of tailgate in the appointments colour, the same as the seat centre panel

Velour floor mats in black with edging in leather

Air vents in silver chrome

AMG floor mats in black, only with AMG Line

Control panel for power windows on driver's side in silver chrome

Power window switches on front passenger side and in rear in silver chrome

Multifunction steering wheel in Wood and Leather

The wood/leather multifunction steering wheel in high-gloss brown ash wood combines fine materials with innovative ease of operation. Ergonomically arranged Touch Control buttons enable intuitive control of navigation, telephony or entertainment. As such you have everything under control without taking your hands off the steering wheel.

Burmester® surround sound system

Experience more performance and exclusivity with the legendary Burmester sound. The high-performance speakers develop first-class surround sound. You can specifically optimise this for the front and rear seats to intensify the listening experience. The basis for this is the 10-channel DSP amplifier, the output power of which is perfectly matched to the speaker system. Sophisticated noise compensation (VNC) adjusts music and sound dynamically to your driving conditions so as to provide you with the best possible level of music enjoyment at all times – whether you are driving on the motorway or in the city. Concentrate the listening experience in a location of your choosing with the Sound Focus function.

A phenomenal listening experience that can also be seen: with the high-quality design of the speakers and the characteristically designed covers in metal including Burmester® lettering, the vehicle takes on a particularly classy look and enables you to show that you are a music lover and aficionado.

15 high-performance speakers precisely tailored to the vehicle interior to ensure well-balanced and dynamic music reproduction

A total output power of 590 W (7 x 50 watts and 2 x 120 watts) for maximum sound quality with high volume reserves

Multichannel support for true surround sound

Sliding sunroof

In many situations the sliding sunroof anticipates your wishes to protect both you and your vehicle: if it starts to rain, the open sunroof receives a signal from the rain sensor to move to the tilted position automatically. This prevents water from entering into the interior. Even if you park your vehicle with the sunroof open, it automatically moves to the tilted position thanks to the anti-theft function. And if there is a risk of a rollover in a potentially dangerous situation, the sunroof can close automatically thanks to the PRE-SAFE® system. It also interrupts the closing procedure automatically if an obstruction is detected, moving the roof slightly to the rear again – for example to prevent a hand from being accidentally trapped.

Ambient lighting with 64 colours

Stylishly coordinated colour schemes give structure to the interior. Showcase the interior according to your personal preferences or current mood. The 64 colours of the ambient lighting create exciting colour schemes, which can alternate dynamically or illuminate several areas in different colours. The ambient lighting promotes a sense of well-being while driving. This also makes this equipment a fundamental part of the optional ENERGIZING comfort control with its tailor-made programs for comfortable, focused and relaxed travel.

MULTIBEAM LED

For your perfect vision: the adaptive MULTIBEAM LED headlamps with individually controllable LEDs react to the traffic situation. Partial main beam omits other road users without dazzling them. The active light function illuminates the field of view to optimum effect.

Active Multicontour Seat package.

People have always sought relaxation in nature. And now it's possible in an urban environment, too – thanks to the active multicontour seats with dynamic and massage functions for the driver and front passenger. Inflatable air chambers and lumbar support ensure optimum seating comfort and outstanding lateral support. In addition to this, eight massage programs enhance the feeling of well-being and turn every trip into a unique and enjoyable experience.

FEATURES AT A GLANCE

Active multicontour seats in the front with separately adjustable air chambers which can be set via the multimedia system

4-way lumbar support with adjustable air chambers

Dynamic driving functions with automatic lateral stability depending on steering angle, lateral acceleration and speed of the vehicle

14 air chambers enable ENERGIZING massage function featuring 8 different programmes with a relaxing, stimulating or mobilising effect, "firm" and "gentle" settings, duration between 12 and 15 minutes

Two of the massage programmes have an additional warming effect modelled on the hot-stone massage principle

Seat heating and climatized seats for driver and front passenger

Active multicontour front seats with dynamic function and massage function

Electrically adjustable lumbar support

Massage function with 14 air chambers in the seat backrest

Massage function with four air chambers in the seat cushion

Massage heating panels in the spinal area

Fast-acting seat heating Plus

Climatized seats

Rear seat entertainment system

First-class entertainment, in the second row too: enjoy films, play video games or relax with your favorite music. Two 25.4 cm (10-inch) touchscreen displays show passengers in the rear their own personal programme in outstanding image quality.

FEATURES AT A GLANCE

Two touchscreen displays with 25.4 cm (10-inch) screen, diagonal

USB 2.0, AUX and HDMI interfaces (SD memory cards via adapter)

Integral media player

Internet access via browser

Grab Handles in leather

Highest quality for your interior: The roof grab handles are finished in the finest nappa leather in the grip area – for a perfect design and a particularly pleasant tactile experience. The leather-covered closing handle in the tailgate also underscores your high standards.

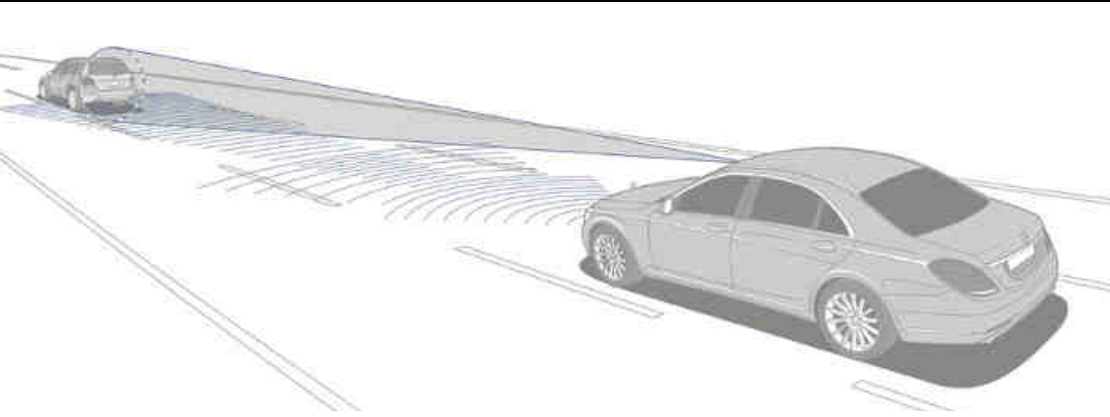

Seat belts in macchiato beige

Ionisation of the interior air

The system enriches the air with negative oxygen ions. This creates a pleasant sense of freshness, like being near a waterfall or after a storm. In addition, the larger filter system absorbs harmful substances such as sulphur dioxide or nitrogen oxide. This also applies for odours which are generated by farming activities.

Driving Assistance

The Assistance package includes Active Distance Assist DISTRONIC as well as Blind Spot Assist. These take the strain off the driver both in the city and in rural traffic, and help to ensure greater safety when driving by monitoring the vehicle's "blind spot".

Parking package with 360° camera

Optimum parking service on board: Active Parking Assist with 360° camera makes it easier for you to find a parking space and to manoeuvre into and out of parking spaces. The choice is yours: thanks to all-round visibility you can park your vehicle yourself – or have your vehicle parked stress-free.

Fire extinguisher

A fire extinguisher on-board ensures that when your off-road adventure takes a risky turn, you're always ready to keep yourself and your fellow travellers safe.

URBAN GUARD vehicle protection

The URBAN GUARD vehicle protection provides all-round monitoring. It comprises an anti-theft alarm system plus tow-away protection which is able to detect changes in position. Movement in the interior also triggers visual and audible warnings. The theft and parking collision detection from Mercedes me notifies you via app. The URBAN GUARD label on the front side windows provides a deterrent against break-in and theft – sending a clear message to potential thieves.

Anti-theft alarm system

Tow-away protection with visual and audible warning when a change in position is detected

Alarm siren

Interior monitoring system (triggered when there is movement in the interior)

Theft and parking collision detection, available to use free of charge for 3 years following activation

URBAN GUARD label on the front side windows

My Mercedes. My Service.

You enjoy life. We'll take care of your Mercedes.

The best or nothing! This statement conveys how Mercedes-Benz aspires to develop and build highly desirable, top-class vehicles. The same passion, pledge and commitment apply to the Mercedes-Benz Service too. The bouquet of world-class After-Sales products will not only attend to every need of your Star but will also redefine the concept of ownership experience with a focus on providing end-to-end customer delight. After all, you Star deserves nothing less than the best.

STAR EASE

Delivering the best-in-class value

Servicing your Star does not get any better than this. With the STAR Ease Maintenance Packages, pay a defined cost of maintenance based on the model, contract period and mileage and say goodbye to spending on service every time. Plus, enjoy exclusive features like priority handling, shorter waiting time and quicker processes.

Advance Assurance Program

Extending your warranty coverage

With Advance Assurance Program, experience complete peace of mind. While this Extended Warranty Program kicks in the moment your standard 3 years warranty comes to an end, it can be extended further up to 6 years at a nominal price. Also, it comes with a bouquet of privileges for a worry-free time with your Star.

MOBILO

Providing you 24x7 mobility support

Your vehicle comes with Mobilo which provides round-the-clock on-road assistance service. Mobilo comes as a standard for 3 years and can be extended further up to 8 years at a nominal cost. This service offers privileges like vehicle towing facility, replacement vehicle, hotel accommodation, just to name a few.
